

### Supply Chain Management [SCM]

Supply Chain solution efficiently manage supply chain from order to warehouse receipt and proof-of-delivery. Organizations, using sophisticated alert system can focus and take corrective action before the delivery issues can arise.

'TOPSPIN' SCM takes care of production with strict quality control at different stages of manufacturing cycle, help machinery maintenance and engineering management, reconcile inventories and coordinate vendor wise purchases.

Additional raw-material procurement system compare quality grades with landed costs, ginner and station wise that itself contributes significantly towards ERP procurement and implementations ROI.

The sales management system helps to plan distribution logistics and documentations.

### Functionalities:
